01 / THE QUESTION BEHIND AVEO

We didn’t build another token.

We built a way to explain what stops one.

Start with a real operator question: Why can’t this wallet move this asset?

02 / THE SCALE HYPOTHESIS

One proof. Ten assets. One expiry.

Ten investigations — or one shared cause?

REUSABLE FACTS

One eligibility proof

Different assets can rely on the same verified facts.

INDEPENDENT RULES

Separate asset policies

Reusing a proof does not mean sharing every rule.

OPERATIONAL LEVERAGE

Understand the impact

Group affected assets instead of hiding the common cause.

Ten assets is an illustrative scaling scenario. The current demonstration uses two; scale and time savings are not validated.

03 / THE PRODUCT

The interface explains.
The chain enforces.

Diagnose → understand impact → verify recovery.

01 / DIAGNOSE

See the reason

Inspect proofs, policy and current eligibility.

02 / COORDINATE

Prepare the correction

Bring affected assets into one operational workflow.

03 / VERIFY

Read the new state

A submission is not proof that recovery is complete.

SAS attestations + independent policies + Token-2022 Transfer Hook. No MPL-3643 integration claim.

04 / MARKET AND ENTRY POINT

Big asset market.
Focused software wedge.

More assets with rules could mean more operational work.

INDUSTRY CONTEXT / PROJECTION

~$2 trillion by 2030

Tokenized financial assets.
McKinsey, June 2024; excludes crypto and stablecoins.

OUR INITIAL BUYER / HYPOTHESIS

Multi-asset platforms on Solana

Paid operations tooling and integration support.
Next: an operator pilot. Pricing and demand are unvalidated.

Asset value is not Aveo's revenue or software TAM. Source: McKinsey's 2024 projection.

05 / WHY THIS TEAM

Domain experience.
Builder energy.

A personal origin. A shared business ambition.

BRUNO / COMPLIANCE EXPERIENCE

20 years in complex operations

Audit, internal controls, compliance,
intelligence and investigations.

FOUR UNIVERSITY STUDENTS

Complementary technical skills

Including Bruno’s son.
Building and learning together.

Our ambition: turn this collaboration into a company around a real operational need.

06 / AN INVITATION TO VERIFY

Don’t take our word for it.
Follow the evidence.

Open the matrix. Inspect a wallet–asset result. Ask why.

AVAILABLE NOW

Public devnet candidate

Deployed program, genuine test accounts
and real read-only browser evidence.

THE NEXT MILESTONE

Complete acceptance + operator pilot

Seeking feedback and ecosystem partners.
Wallet and full security acceptance remain open.

Synthetic eligibility data · no real KYC · no independent professional audit.
Core ambition: dependable eligibility operations for tokenized assets.
